

## Analogue outdoor clocks

Analogue outdoor clocks, single, double, or multisided models, available complete with housing or without housing as installation kit. All NIS analogue outdoor clocks are made of high-quality material (flat slave clock radio-controlled movement with a thousand times proven brass gear wheels and stainless steel shafts, no plastic material). Operating temperature range of  $-30$  to  $+80^{\circ}\text{C}$ .

- round clocks with dial diameter 40/50/60/80 cm
- square clocks with dial diameter 40/50/60/80/100 cm
- single-sided clocks for wall mounting, double-sided clocks with choice of wall or ceiling bracket
- aluminium baton hands (hours and minutes) with black painted finish
- flat, robust movement with brass gears and stainless steel shafts operating temperature of  $-30^{\circ}$  to  $+80^{\circ}\text{C}$
- mains-operated 230 V or battery-operated (without lighting)
- Plexiglas dial backlit, with choice of 4 dial models according to DIN 41 091
  - Hour markers
  - DIN markers
  - Arabic numerals
  - Roman numerals

## Operating modes:

- Classic slave clocks, switchable 12 V/24 V/48 V/60 V for polarity-alternating minute impulse
- Intelligent TELNU system clocks
- Autonomic radio clock, with time signal DCF77 or via GPS
- Intelligent, self-monitoring NIS-net time clock
